--:0:--

I. MYSORE CITY.

The Department of Public Works has been carrying on the different road and building works in the Government House Compound. The servants' latrine in the compound is being repaired. The main storm water drain in the compound is being kept dry.

In proximity to the Government House there have been no cases of epidemic diseases. Special endeavour is being made to keep down plague in the City. Inoculation, rat destruction disinfection and evacuation of affected and neighbouring houses are receiving due attention.

II. KARAPUR CAMP.

The Chief Sanitary Inspector assisted by the Sanitary Inspectors of Heggadadevankote and Mysore taluks is exercising necessary vigilance in respect of epidemics in the area. Vaccination of all unprotected children is being carried out in the villages within a radius of five miles from the Karapur Camp.

References have been made to the Amildars of Nagamangala, Krishnarajpet and Nanjangud to ahev have sweepers and scavengers in reddiness to be impressed into service at Karapur at the shortest possible notice.

I am proceeding to Karapur at an early date for inspections and for initiating the further arrangements called for.

BRIEF NOTE ON THE PROGRESS OF SANITARY ARRANGEMENTS INCONNECTION WITH THE FORTHCOMING VISIT OF H.E. THE VICE-ROY, FOR THE FORTNIGHT ENDING 30TH SEPTEMBER 1923.

I. Mysore city.

The work on the demolished Servants' Latrine and the two drains in the compound of the Government House has not been as yet been commenced. The compound is being kept clean by the Park authorities. Two extra men have been engaged to keep the main storm water drain clean. There have been no cases of epidemic diseases in the proximity to the Government House.

II Karapur Camp.

The chief Sanitary Inspector inspected all the important villages along the Karapur Camp and also the villages surrounding the same. A few cases of Plague were found to have occurred in Kallegowdanahalli, a roadside village, inthe Heggadadevankote Taluk. The village has already been evacuated and steps have been taken to remove the temporary sheds put up on the road side by the Panchamas of the village, to a distant place.

Arrangements have been made to ensure that the villag-

(7)

I. MYSORE CITY.

The iron frame work for the new latrine in place of the old demolished latrine is being put up. The work on the drain leading from the trough for watering animals has not yet been commenced. The drain from the kitchen is running dry and the ground is excavated for laying an underground drain.

The main storm water drain is being kept clean and clear of water.

The compound is being kept clean by the Park authorities. Four of the Government House servants who had not been recently revaccinated were revaccinated. The servants' quarters were inspected and one unprotected child was vaccinated.

In proximity to the Government House there have been no cases of epidemic diseases.

II. KARAPUR CAMP.

Two cases of malaria among the 300 labourers at present employed in the Karapur Camp were treated and are improving. The detection of malaria among labourers is receiving special attention in view of the fact that each person ill means one reservoir of infection.

One Sanitary Inspector, one Maistry, 6 sweepers and two conservancy carts have been maintained from the middle of October 1923.

The sheds required for the accommodation of sweepers, overseers, maistries and the higher supervising staff as wellas for the Laboratory are being put up.

Sixteen temporary latrines and an adequate number of dustbins have been provided. The rubbish and the night-soil are being distroyed by incineration.

BRIEF NOTE ON THE PROGRESS OF SANITARY ARRANGEMENTS IN CONNECTION WITH THE VICEREGAL VISIT,-IN MYSORE CITY AND AT KARAPUR.

--:(0):--

I. MYSORE CITY.

One Sanitary Inspector and one Sanitary Overseer have been posted to the Government House.

Twelve Sweepers have been appointed from 1st November to keep the compound clean. Sweepers to attend to t h e different bath rooms in the tents will be appointed by the Superintendent, Government House.

Two Maistries have been posted.

Six men who would be appointed to sweep the approaches to the Government House and tents will be provided with clean dresses.

Three hand carts have been kept ready.

Two night-soil carts to carry the refuse from the Hand-carts will be engaged from 28th Instant.

Three Garbage boxes with wire-netting covers and six Circular dust-bins have been kept in Government House premises.

Thirty buckets have been kept ready.

All the implements are with the staff.

The water from the tap is being examined twice a week and the result of water from one of the taps in rotation and from the Berkefeld filter is being furnished to the Private Secretary to His Highness the Maharaja and also to the Executive Engineer, Water-Supply Division and the Superintendent, Government House.

The Superintendent, Government House states that he has received the supply of filter candles. They will be sterilised in the Health Officers presence.

P.T.O.

II. KARAPUR CAMP.

Latrines used by Indians.
Temporary latrines.

Twenty-five temporary latrines have been constructed on the leeward of the Camp. The inner dimensions of each latrine are 10' x 3' divided into 2 partitions of 2 seats each and each latrine having a trench measuring 10'x 1½'x 2½'. The side and partition tatties have been plastered with mud and sign-boards are also completed. A space of 3 feet round the latrines has been scraped and a road leading to each latrine from the road has been got up. A heap of powdered earth has also been stored near each latrine.

The distribution of latrines is as follows :-

Two for Public Works Department staff.
Four for Government House Staff.
Four for Post-Office departmental officers and their subordinates.
Two for Police Staff.
One for Hillographic Signallers.
One for Bandmen.
One for supervising Sanitary Staff.
Two for Palace Mid servants.
Two for Palace Male servants.
Two for Palace Chauffers.
Two for Coolies.
One for Electric Department Staff.
One for Water Works Department Staff

PERMANENT LATRINES

Government of India pattern for the use of His Excellency's servants. They consists of 2 sets of 4 each. The whole of the area 8 feet surrounding the latrines has been cleaned, scraped and levelled. The pits have been filled in with chunam mixed with earth.

INCINERATOR.

It is built at a distance of nearly 3 furlongs away from the Camp to the leeward direction and the night soil of the camping ground is being burnt everyday.

SPILL WATER.

Wherever the average daily quantity is small, the water is lead off into double absorption trenches with safety lead-offs thus avoiding the collection of pools of water on the surface.

(12

"CONJI" WATER OF THE PALACE CAMP "BIDADIS"

Arrangements have been made for the collection of "Conji" water in covered receptichaes and pits have also been dug up at a safe distance beyond the Camp for the burial of the same.

FLY NUISANCE.

Besides arranging for carting away to a safe distance for incenerating purposes, all decomposing matter, a sufficient quantity of fly paper (tangle foot) has been stocked.

DISINFECTANTS.

A sufficient quantity of disinfectants has been stocked.

VACCINATION.

Ninety-six persons have been vaccinated in the Camp and villages within a radius of 5 miles.

GENERAL CLEANING.

The general cleaning of the camping area is being attended to every day

EPIDEMIC DISEASES IN THE CAMP
AND VILLAGES WITHIN A RADIUS OF 5 MILES.

--- N i l ---

I visited the Karapur Camp on the 22nd November 1923 inspected the arrangements and issued necessary detailed instructions to the Special Medical and Sanitary Officer. Mr. G.M.Dominick, Assistant Director, Public Health Institute, reported himself on the 22nd Instant for duty in connection with the Laboratory at Karapur.

OFFG. SANITARY COMMISSIONER.
